

TS1 Smart Start Timers

(Patent Pending)

Impossibly small. Huge features.

Modular Design

All our CH series of harnesses, are ready to accept our Smart Start timer at any time, without tools or additional wiring.

Fail Safe

All timer controlled equipment is set to automatically default to ignition controlled in case of timer failure. Even if something goes wrong, redundant failsafes make sure you can finish your shift.

Incredibly Programmable

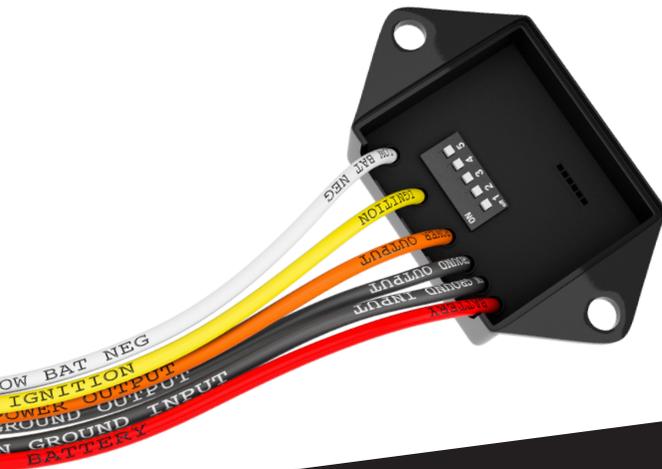

We custom program each timer for you, so you can spend time installing, not programming. Shore power, Smart Start functions, over and under voltage thresholds are just the Start.

Multi Function LED

With a programmable heart-beat, so you know your timer is alive, even when it's doing nothing.

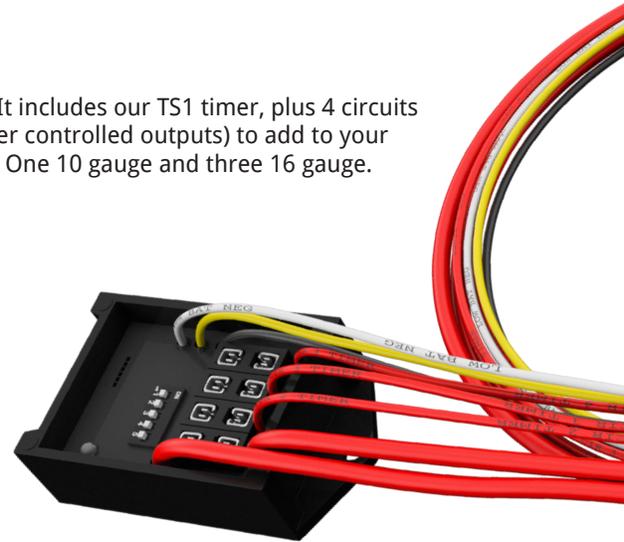

TS1 Standalone

A small but powerful box with TS1 at its core, ready to be installed in any location.

Micro 4

Feature packed. It includes our TS1 timer, plus 4 circuits (1 hot, and 3 timer controlled outputs) to add to your existing harness. One 10 gauge and three 16 gauge.
